

NEW COURSE PROPOSAL FORM

JOHNS HOPKINS
SCHOOL of EDUCATION

Purpose. Use this form to propose a new credit-bearing course for review and approval by the faculty chair(s), program lead(s), and Curriculum Policy Committee (CPC), in accordance with the SOE's [Policies Governing Credit-Bearing Academic Courses](#). For a non-credit or non-degree offering, consult your chair before using this form.

Submission and approval process

1. Complete all applicable sections and prepare the supporting documents that will accompany the proposal.
2. Obtain all required signatures before submitting the proposal to CPC. For cross-leveled or cross-listed courses, include signatures from all involved chairs and program leads.
3. Submit the completed form and supporting documents to CPC for final review and signature.

After CPC review: If the proposal is approved, the CPC Chair will notify the proposing faculty member and the appropriate program or division leadership, as well as the Office of the Registrar or academic program coordinator. When follow-up action is required, the Registrar's Office or program coordinator will confirm when the necessary action has been completed. If the proposal is not approved, the CPC Chair will provide the proposing faculty member with next steps.

Questions: Direct questions about the form or approval process to CPC. Direct SIS-related questions to the Registrar's Office at 410-516-9816 or soe.registration@jhu.edu.

Policy acknowledgment

I confirm that I have reviewed: (1) the [Policies Governing Credit-Bearing Academic Courses](#); (2) the [Policies Governing the Academic Program Life Cycle](#); and, if applicable, (3) the [JHU Instructional Delivery Methods](#).

☒ Yes

☐ No

COURSE INFORMATION

Course identification

1) Proposed course prefix (e.g., 810 or 861)

893

2) Proposed course level (e.g., 100-level or 500-level)

500

3) Proposed course title

Principles of Learning Engineering for Next-Generation Systems

4) Program(s) with which the course will be affiliated

Learning Design and Technology (LDT)/Dept. of Counseling and Educational Studies

5) Cohort affiliation, if any

N/A

6) Proposed credit weighting

Review the Academic Credit Hours section of the SOE policy to confirm compliance with school and university credit-hour requirements.

3.0

Prior MHEC approval

7) Was this course previously approved as part of a Maryland Higher Education Commission (MHEC) program proposal?

☒ Yes☐ No

8) If Yes, was it approved as part of the program listed in Question 4?

☒ Yes☐ No

Course schedule and description

9) Proposed start date

☐ Fall☒ Spring☐ Summer

Year

2027

10) Proposed course descriptor

Learning engineering treats human capability as an engineering problem: capability is the interface between what a system requires of its human operators and the impact that system delivers. Engineering that interface is the central problem of the field. This course establishes the principles

11) Course type (select all that apply)

☐ Lecture☐ Seminar☐ Internship☐ Practicum☐ Independent Study

12) Course restrictions and/or prerequisites, if any

893.652: Learning Sciences Studio: Theory, Analysis, and Educational Technology Design

DELIVERY AND PROGRAM ROLE

Instructional delivery method

13) Proposed instructional delivery method

Select one option. The selection should align with the university-wide [JHU Instructional Delivery Methods](#).

- ☐ **In-person.** 100% of required instructional time is scheduled in person. This includes a flipped classroom when the meeting pattern is scheduled like an in-person course and online content supports application or discussion.
- ☐ **Blended.** Some, but not 100%, of required instructional time is in person; the course includes an in-person meeting every week.
- ☒ **Online - asynchronous.** 100% of required instructional time is online and self-paced within an established timeframe.
- ☐ **Online - synchronous.** 100% of required instructional time is online and includes real-time virtual sessions.
- ☐ **Online - hybrid.** 100% of required instructional time is online and combines synchronous and asynchronous instruction.

Course replacement and role in the program

14) Will the proposed course replace an existing current course?

- ☐ Yes ☒ No

15) If Yes, enter the course number being replaced.

16) Will the proposed course be offered as a core course requirement within the program(s)?

- ☒ Yes ☐ No

17) Will the proposed course be offered as an elective within the program(s)?

- ☒ Yes ☐ No

CROSS-LEVELING AND CROSS-LISTING

JOHNS HOPKINS
SCHOOL of EDUCATION

Cross-leveling

18) Is this course cross-leveled?

Cross-leveling means offering the same course at multiple academic levels (for example, master's and doctoral) under different course numbers.

☐ No ☒ Yes - complete the fields below

Paired course number

Level of paired course

☐ Master's

☒ Doctoral

Describe the differentiated requirements for the different levels.

Weekly discussions and labs (20%)

The weekly Additional Reading (one peer-reviewed paper, optional for master's students) is required for EdD students, who anchor at least one post per module in the primary literature rather than the assigned synthesis texts.

Cross-listing

19) Is this course cross-listed?

Cross-listing means offering the same course under multiple programs with different course numbers.

☒ No ☐ Yes - complete the fields below

Partner department(s)

Cross-listed course number(s)

Primary department

☐ This department

☐ Partner department

Programs involved in the cross-listing

LEARNING OUTCOMES AND ASSESSMENT

Learning outcomes and alignment

20) Student learning outcomes

Course Learning Outcomes:

CLO 1. Decompose a system performance requirement into measurable human, system, interface, and capability requirements.

CLO 2. Model a learning environment and its host operational system as interacting systems with defined components, interfaces, and feedback loops.

21) Alignment with program learning outcomes, SOE dispositions, and applicable state, national, or professional standards

Describe how the course learning outcomes align with these elements.

Course Learning Objectives Alignment to LDT PLOs

(<https://e-catalogue.jhu.edu/education/programs/masters/learning-design-technology-master-education/#learningoutcomestext>):

CLO 1. PLO 1.3; PLO 1.4

CLO 2. PLO 2.2

Assessment and grading

22) Course assessments

Describe the assessments anticipated for measuring the learning outcomes above.

Weekly discussions and labs (20%). Each week includes either a discussion prompt tied to the module reading or a hands-on lab (modeling, requirements writing, case analysis). Students post an initial substantive contribution and collaborate with peers, with responses drawn from different professional domains where possible. Labs produce a short artifact (a system diagram, a requirements draft, a coded case analysis) that feeds the graded assignments. Cases are assigned weekly and carry the discussion. Module 5 adds three graded case memos: short analyses that code the case with a named failure analysis method. Justify the method against the

23) Course assignments, evaluation, and grading

Describe the anticipated assignments, the basis for determining grades, and the relative weight of each assignment, examination, or other graded component. Explain how assignments align with program learning outcomes, SOE dispositions, and course learning outcomes.

Weekly discussions and labs 20%

Assignment 1: Capability Analysis 20% (CLO 1–3)

Assignment 2: Iteration Cycle Report 20% (CLO 4–5)

Final: Integrated Analysis and Briefing 30% (CLO 6–7)

Dispositions Portfolio 10% (CLO 6)

RATIONALE, RESOURCES, AND ATTACHMENTS

Rationale and stakeholder involvement

24) Rationale for introducing the proposed course

Explain the academic need for the course, using available data, and how the course aligns with the School of Education's vision, mission, strategic plan, dispositions, unit assessment plan, and any applicable state, national, or professional standards. If the course is part of a new program proposal requiring MHEC approval, this section may be omitted because the rationale was addressed in that proposal.

N/A: Course submitted as part of MHEC proposal

25) Persons or stakeholders involved in course development or decision-making, and the nature of their involvement

Examples may include adjunct faculty, professional practitioners, or alumni. If this was addressed in an MHEC program proposal, this section may be omitted.

N/A: Course submitted as part of MHEC proposal

Resources

26) Will additional faculty, facilities, technical, or IT resources be required?

☐ Yes

☒ No

27) If Yes, describe the anticipated resources

If this was addressed in an MHEC program proposal, this section may be omitted.

SUPPORTING DOCUMENTS AND COMMENTS

JOHNS HOPKINS
SCHOOL of EDUCATION

Supporting documents

28) Supporting documents

Submit supporting documents, such as a syllabus, with this form. List the attached file names below.

N/A: Course to be developed

Additional information

29) Other comments or items to note
